## **Risk Warning**

Foreign exchange and derivatives trading can be very speculative and may result in losses. Foreign exchange and derivatives trading involves considerable risk and is not suitable for every investor.

This website does not take into account the objectives, financial situation or needs of individual users. Hence, you should carefully consider whether trading in foreign exchange and derivative products is appropriate for you in the light of your own circumstances. You should be aware that dealing in products that are highly leveraged (geared) carry significantly greater risk than non-geared investments such as share trading. As such, you could both gain and lose large amounts of money. You may sustain losses in excess of the margin required to establish and maintain any positions in leveraged products. You may sustain total loss of all your funds in your account with TTMAU.

Before you commence trading in our products you should fully understand the risks. You must read our Financial Services Guide and our Product Disclosure Statements which have more detailed explanations surrounding the risks involved in foreign exchange and derivatives trading.

We have prepared separate Product Disclosure Statements for different financial products. The Financial Services Guide and the Product Disclosure Statements can be accessed via our website or by contacting us and asking for a copy.

**Please read these documents** as they provide you with important information about the risks that are associated with the financial products we offer.
